

## Manual testing Plan

<https://trello.com/b/T6SMqtiy/qa-project-assessment>

The screenshot displays a Trello board interface for a QA project. The board is titled "QA Project/Assessment" and is located within "MChaudry's Workspace". It features four columns, each with a header and a list of cards. The "To Do" column contains one card, "Test Plan for Tic Toc Game". The "Test Passed" column contains three cards detailing test cases for game rules. The "Test Failed" column contains two cards detailing test cases for game logic. The "Bug Report" column contains two cards detailing bugs related to game state and player declaration. Each card has a title, a description, and a footer with a "+ Add a card" button and icons for attachments and comments.

**Board:** QA Project/Assessment

**Columns:**

- To Do**
  - Test Plan for Tic Toc Game
- Test Passed**
  - Test Case: A single player should be able to start the game
  - Test Case: Players should be able to put one O or X at a time.
  - Test Case: Players can place an X or O on the board.
- Test Failed**
  - Test Case: It should declare who won correctly.
  - Test Case: When 3 Os or Xs are lined up then it would be declared winner.
- Bug Report**
  - The app falsely declares the 'loser' as 'winner'
  - The app automatically changes an X to a lower case 'o' in the leftmost square in middle row.
